PROFESSIONAL SUMMARY

Game Development student at Full Sail University and founder of Cabdem Marketing LLC, developing Python/Flask web applications and an object-oriented C++ trucking simulator. Experience with business workflows, debugging, version control and software deployment, supported by 15 years in commercial trucking and logistics.

TECHNICAL SKILLS

Languages & Web: C++, Python, HTML, CSS, JavaScript, SQL

Frameworks & Tools: Flask, Visual Studio, Git, GitHub, GitHub Pages, PythonAnywhere

Development: Object-oriented programming, relational databases, file I/O, input validation, debugging, modular design, pull requests

PROFESSIONAL EXPERIENCE

Founder & Web Application Developer | Cabdem Marketing LLC

- Developed and maintained database-driven Python/Flask websites, including online storefronts, auction and inventory workflows, customer-facing features and administrative dashboards.
- Handled feature development, issue diagnosis, UI improvements and deployment across independent and small-business web projects.
- **Featured platforms:** Mel's Simply Reclaimed (auction and retail), Willow's Melting Pot (storefront), and TruckzSim website (browser-based trucking platform).
- **Additional web projects:** June's Creations (storefront), Menus-To-Go (promotional prototype), Cabdem Marketing (business website), and Kloak & Daggurrs (gaming-brand concept).

FEATURED C++ PROJECT

TruckzSim - Trucking Company Simulator | Full Sail University

- Built a C++20 console simulation using Truck, Driver, Load, Company and manager classes; added dispatch, driver Hours of Service, fuel, maintenance, repairs, payroll, banking and company save/load systems.
- Applied encapsulation, modular programming and validation; debugged Windows compiler/linker errors and used GitHub issues, branches and pull requests across four course milestones.

EDUCATION

Full Sail University | Bachelor of Science in Game Development

Expected Graduation: June 2028

ADDITIONAL PROFESSIONAL EXPERIENCE

Commercial Truck Driver | 15 Years

- Coordinated time-sensitive freight operations, planned routes, managed changing conditions and solved logistical problems; applied firsthand industry knowledge to TruckzSim.
